The President arrived in the city at 10.45 this morning and went to Rennert's Hotel, where quar ers had been engaged for himself and his party.

Among those who accompany him are Post-

AN ORNATE EDIFICE.

Ehrich Bres.' Sixth Avenue Dry-Goods Palace Will Soon Re Open.

Sixth avenue, between Fourteenth and Twenty-third streets, the Mecca of shoppers, is about to be made even more attractive for the ladies,

For months past workmen have been busy on a new building on Sixth avenue, near Twenty-third street, and under their experienced hands third street, and under their experienced hands it has been gradually taking shape until now its graceful proportions, artistic lines and modern appointments, about finished, make it an ornament to the city. It is the new home of Ehrich Bros., the dry-goods princes, who are about to remove to these centrally located stores.

No expense has been spared to make it a model establishment, and the craftsman's skill has

everywhere striven for and secured the best results, and the occasion of its occupancy will afford all the opportunity of witnessing the result of combined liberality and good taste in this perfectly appointed trade palace.

To give an idea of the vast proportions of the edifice, a few details are given. The frontage on Sixth avenue measures 0; feet, on Twenty-second street 71 feet. The main front is, of course, on Sixth avenue. The building is five stories high, and all the beauty of the Italian Hensissance has been embodied by the architects. William Schickel & Co., in the facade of granite and iron. On the Sixth avenue side the front is divided laterally into five equal bays. In the first story these are formed by polished granite columns, with rich bronze capitals supporting a massive cornice, of which the frieze is of polished Jonesboro granite. The upper stories are of iron on both the Sixth avenue and Twenty-third street fronts, while the Twenty-second street front is of brick and terra-cotta.

Vertically these fronts are divided into three grand divisions, of which the first story forms the first or basement feature, the second, third and fourth the second feature and the fifth story forms the last feature or division. There are skiifully sub-divided to sut the height of the several stories.

The whole building is crowned by a rich cornice of bold projection. On top of this is story forms the last feature or division. There are skiifully sub-divided to sut the height of the several stories.

The names of firms that have been employed fitting up the building would make an extensive list. It is cut down to only the principal ones, who are Herter Bros., of Fifth avenue, cabinet work; McCabe Bros., of Fifth avenue, cabine sults, and the occasion of its occupancy will afford all the opportunity of witnessing the re-

Dreamland Tips on Ruces Are Not Always

Race-goers are just as superstitious as lottery-players, so far as dreams are concerned. Both place implicit faith in dreams, and they back their faith with money.

Race-goers receive tips in all sorts of ways. Some time ago, during the ride on the train to Brighton Beach, a well-known sporting man saw three gray horses standing together. It instantly flashed through his mind that gray horses would win that day and he played accordingly. Sure enough there were three gray horses entered in as many races that day and each won a race. It was mere chance, however, but the gentleman still looks for tips in such directions.

On the other hand, a lady told an Evening Wohld reporter that she dreamed of a red sky which had running across it a blue line. Curiously enough, there was a horse named Curiously enough, there was a horse named Blue Line entered in a race next day. She played heavily and lost. The horse was no-

ting on a railroad track when a locomotive came along and whistled. The whistle as d: 'Valley Forge wins."

He backed Valley Forge the next time he ran and got \$4 for every \$1 he put up.

There are just as many dreams that result the other way, however, and tips from dreamland are as a rule dead losers.

Street-car conductors and other officials in the employ of private corporations, as well as those who work for the Government, have always been more or less prejudiced against wearing a uniform, principally because it is so inconvenient to change it when their hours of labor are over, and attracting so much attention when worn on the streets.

seven years. There is scarcely a mining camp on this coast that this woman did not visit during its prosperity since the days of 1849. Her history, if correctly told, would fill a large volume, says the St. Louis Globe-Democral, and it would be a volume of bad deeds only, for no good deeds have ever been attribated to her in the knowledge of those few who have known ber history for the past forty years. It seems that she gloried in the crimes she committed, and during her convivial ments would relate some incidents of her past life.

From this source it is gathered that at an early age in her native land of Central America she became the mistress of a noted sea pirate named Valzaj, whose vessel was a terror to the merchant ships plving the waters of the Pacific Ocean.

She boasted that her duty was, when the ship anchored at a port of prominence, to decoy rich men about the vessel, where they would surely be robbed and murdered. She followed this criminal career until the discovery of gold in California, when she left

She soon drifted to the gold mines, and fol-lowed every excitement from that date until the time of her death, plying her nefarious calling, and a terror in the community in which she happened to cast her lot. It is said Spanish Belle boasted of having murdered four men herself alone for money. four men herself alone for money.

WILSON BARRETT AT SEA. FROM THE CITY'S WHIRL. IT IS FOOTBALL SEASON. FREE LAUGHTER FOR ALL.

FOR THE EXCITING GAME.

Frank Stevin Will Start a Monster Walk ing Match-C. O. Wells May Prove the Champion Long . Distance Russer-Double-Scult Race in the Nonparell Club -Luther Carey, the Western Sprinter,

The football season is at hand. Athletic young men, clad in the tough canvass jecket or the clusive jersev, may soon be seen chastoo, and it is easy to recognize from the tone ing hither and thither over the athletic fieldevery nerve, muscle, tendon, sinew and all the intense energy of robust youth bent on sending the leathern spheroid into the enemy's territory. The "rusher" will seize the ball, clasp it to his stalwart breast and surge mightily against the opposing rush-line. He may break through or be successfully "tackled" and sat on by a majority of his adversaries. The wiry and wily quarterback will make a lightning-like "pass to the expectant half-back and away will sail the speroid, impelled by a mighty kick, and drop prettily over the cross bar—a notable play and one to warm the cockles of the hearts triendly to the wondrous kicker. The owners of the hearts will promptly send great shouts of triumph recedeting skywards. Now and then, to be stree a player may drop from the rauks with a sprained ankle or a bruised shoulder, but casuaties are few considering the number who engage in the fascinating game. Football is one of the most exciting and maniy games ever invented when played with the skill and the good nature displayed by the most conspicuous teams in recent years.

Frank M. Slevin, the well-known manager of athletic events, says he intends holding one of the bigrest kind of walking matches in the new Madison Square Garden just as soon as possible after it is thrown open to engagements. It will be a six-day go-asyou-please-affair. In addition to the pedestrian contest, which Mr. Slevin says will contain many novel features calculated to interest and smuse, there will be a side issue in the way of a temale bicycle race, to be held simultaneously with the larger event on an inner track, raised above the level of the floor.

C. O. Wells, an athletic member of Am-C. O. Wells, an athletic member of Amberst College, seems destined to prove a very formidable competitor for long-distance running honors. His remarkable time for the nule in the Intercollegiste champtonship at Berkelsy Oval last May, will be remembered. He is studying to enter the ministry, and as he is only in the second year of his course, it will be several years probably before he is ordained, which will afford him ample time to cultivate his wonderful fleetness of foot to cultivate his wonderful fleetness of foot. This makes it look as if Wells was the coming long-distance amateur champion.

The Harlem River will shortly be the scene of a double scull race between members of the Nonpareil Heat Club. The oarsmen will compete for gold medals offered by Mr. Har-beck, one of the pillars of the Club.

Heavy-weight C. A. J. Queckberner, of the Staten Island Athletic Club, has been poaching on the preserves of less ponderous athletes lately. He is helping himself get into trim by running foot races with fellow-members.

The Columbia College students have secured the grounds at Erastina formerly conjugated by Buffalo Bill's Wild Weat show on which to practise football. A call has been issued to the students urging as many as possible to attend practice in order that the best football material the college contains may be discovered and developed into a creditable team. Columbia has not done herself justice on the football field these last years, but has toboganned far below the point of excellence she formerly occupied.

He looked at the Brighton entries next day, and the first horse that struck his eyes was one called Three Cheers, whose sire was Hurrah.

Although he had never attended a race track before, he went down this day and played Three Cheers. The horse didn't win, but there was 5 to 1 against him for a place and the dreamer won heavily.

This same gentleman dreamed he was sitting on a railroad track when a locomotive came along and whistled. The whistle sa d:

Luther R. Carey, the Western sprinter, is in this city. He is a tall, medium built young man, and does not look like an athlete. He will go into training at once at Travers Island for his race with Westing at the championship meeting next Saturday.

Some, however, were unable to find shelter, and when the sform was over they were in a pitiable condition, with the blood flowing from their numerous wounds. A boy of fifteen and a girl of eleven had their skulls fractured and expired a few hours afterward. More than a hundred persons were badly hurt.

The weight of some of these monster hailstones is estimated in the reports at two pounds. The crops have been totally destroved, many of the trees have been wrecked, and the roofs of the houses and cottages considerably damaged.
